Re: Notification of UST Closure
Piedmont Natural Gas Company
651 North Fayetteville Street
Asheboro, North Carolina
(Randolph County)

Dear Mr. Greene:

Ogden Environmental and Engineering Services (Ogden) recently sampled beneath two 550-gallon gasoline storage tanks during closure activities on September 8, 1992 at the above referenced facility. Based on field screening and analytical laboratory sampling results, petroleum-impacted soil were not detected beneath the referenced storage tanks (detection level less than 6 ppm). An UST Closure Report (including GW/UST-2 form) is pending final data compilation and client review, and will be submitted to the Winston-Salem Regional Office upon completion.

If you have any questions or comments concerning the above, or need any additional information from Ogden, please do not hesitate to contact us.

Sincerely,

Ogden Environmental and Engineering Services

John R. Isham
Project Manager

cc: Mike Parrott, Piedmont Natural Gas Company
